Aim:

We are organizing a special session on “Internet Life” for icast-2017, which will be held in Chaoyang University of Technology, Taichung city, in Taiwan on Nov. 8-10, 2016. Internet has become a necessary part for many people’s life. However, it affects people’s life in both positive and negative ways and it evolves quickly in association with the fast development of computer technology. Realizing how Internet affects people’s life and how technology evolves to help people get a better life quality are crucial for current research trends in computer science and social science. Many dimensions regarding to this issue are covered, such as social networks, people’s relationships on the Internet, Internet shopping, Information search...and so on. The contribution paper would give us novel ideas which illuminate new trends on people’s Internet life or provide solutions for existing problems. So that the object of the special session is to provide a chance for researchers, engineers and scientists to publish their research results related to the methods to improve people’s Internet life. Topics of interest include, but are not limited to:

1. Internet business and Internet marketing
2. Internet shopping and mobile shopping
3. Machine learning and recommending system on the Internet application
4. Data mining on the Internet application
5. Information search on the Internet
6. Internet of things and its application
7. Social networks and human relationships on the Internet
8. Intelligent computing and its applications on the Internet
9. Multi-media on the Internet
10. Virtual communities and technologies on the Internet
11. Case studies showing the success and/or failures of use of Internet technologies on human life.
12. Ethical, legal, and privacy issues of Internet life.
